Element Management Systems

Course Overview

A one-week architectural consulting course designed to help Web NMS customers leverage the experience of WebNMS Framework architectural experts in designing Web NMS based solutions. The course will follow a specific agenda on a need-basis depending on the requirements of the customer and can be utilized by new customers for initial design and prototyping needs or by existing customers for on- going development needs.

Benefits

- Discuss your requirements with our experts vis-à-vis product usage and deployment
- Recognize the design considerations to be made in order to build a fully scalable and extensible EMS/NMS application.
- Leverage the experience of Web NMS consultants to build an optimal solution to maximize productivity of your team and performance of the application
- Fine-tune your solution for scalability, extensibility and performance with the help of Web NMS experts

Intended Audience

- Network Management Architects and Developers building solutions with WebNMS framework

Prerequisites

- Architectural and functional knowledge of WebNMS framework (WebNMS Framework Developer Training course is a prerequisite for those who are new to the platform)
- Experience with Java and XML development

Note :-

- The course will follow a specific agenda on a need-basis depending on the priorities of the customer.
- The consultant will focus on suggesting a design approach for the solution based on the requirements
- The consultancy will be for a minimum of one week but the agenda and duration would be determined based on the consultancy requirements.
